

Curtin University Library Key Open Access Statistics

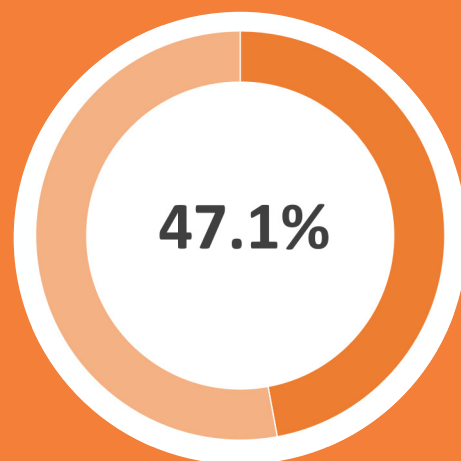

Openly accessible Curtin papers* published in 2018 received

1.5 times more citations

than non-OA Curtin papers.

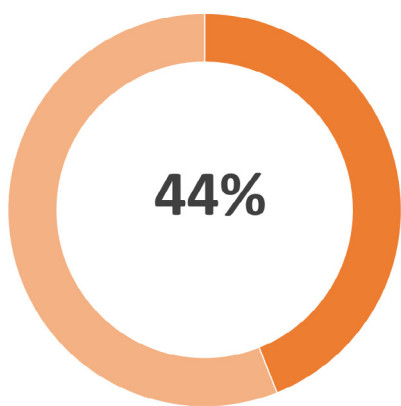

On average, Curtin papers published during 2013 - 2018 received **1.3 to 2.3 times** more citations per year.

Despite this citation advantage only

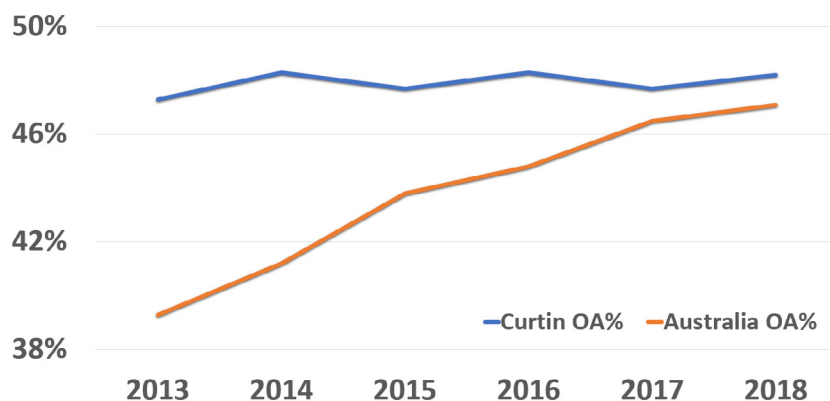

2013 - 2018* Curtin papers were made OA

Curtin has made more papers OA than the average for Australian universities. However our OA percentage has plateaued and other universities are catching up.

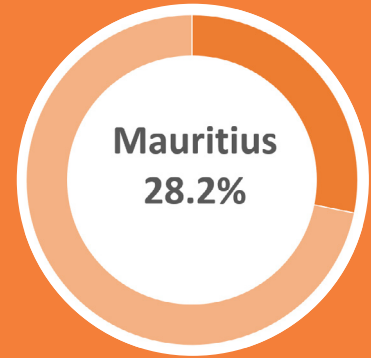

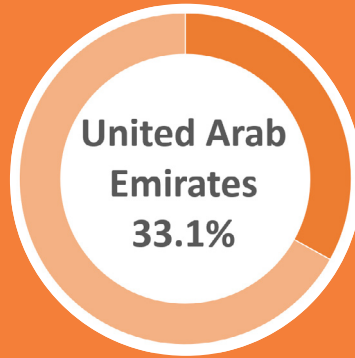

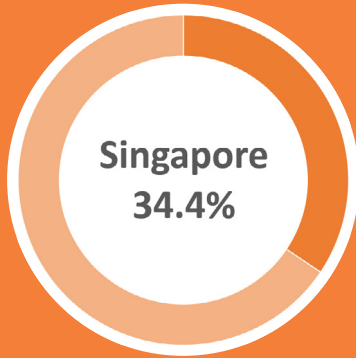

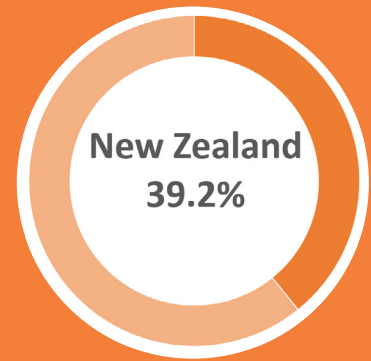

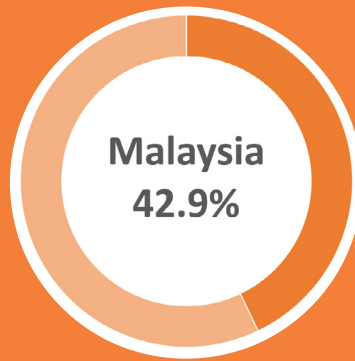

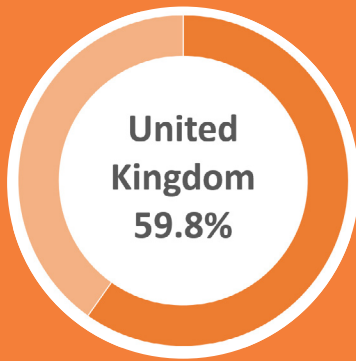

2013 - 2018 Australian papers are OA

% Curtin OA papers and % Australian OA papers 2013 - 2018

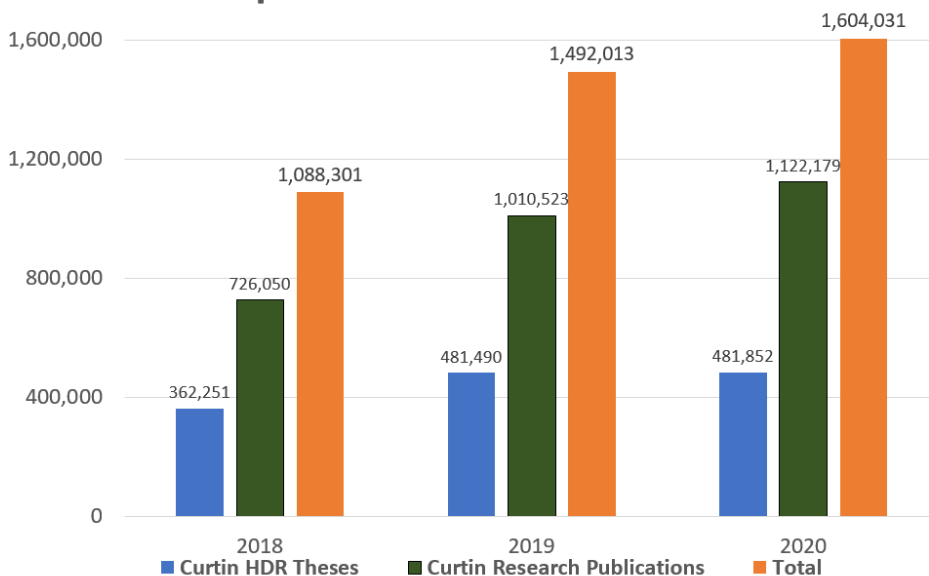

Percentage of 2013 - 2018 papers published as OA globally

See the [COKI OA Dashboard](#) for more detail

espace downloads 2018 - 2020

One path to open access for Curtin researchers is to deposit into espace, Curtin's institutional repository.

Deposit to espace to increase discoverability, usage, and impact.

We need your help to encourage everyone to publish in OA outlets.

- There are three fee-free paths to OA:
- Find an [OA outlet](#) that doesn't charge
 - Participate in a [Read and Publish](#) agreement
 - Deposit to [espace](#)

*Due to embargoes many publications do not become open until over a year after publication so data is only included up to 2018. This only includes scholarly journal articles with DOIs.

Open Access data collected by the Curtin Open Knowledge Initiative (COKI) a strategic initiative of the Research Office at Curtin, Faculty of Humanities, School of Media, Creative Arts and Social Inquiry and the Curtin Institute for Computation.
